

How to add Cindicator Tokens to your Wallet?

- 1 Go to Tokens tab and click on the "Add Token" button

- 2 Fill in the form. Put `0xd4c435f5b09f855c3317c8524cb1f586e42795fa` for "Token Contract Address", "CND" for the "Token Symbol" and "18" to the "Decimals of Precision". Then click on "Add" button.

The screenshot shows the Metamask interface for adding a token. At the top, the Metamask logo and 'Main Network' are visible. The title 'ADD TOKEN' is centered. A circled '2' highlights the form fields: 'Token Contract Address' (with a help icon), 'Token Symbol', and 'Decimals of Precision'. Each field contains the specified values. An orange 'Add' button is at the bottom left, with a hand cursor pointing to it.

You can now see CND tokens in your wallet.
